07 · WHAT THE CREATIVES ARE TELLING US

Real pain points beat big promises

WINNING

Rent

30%

"Next Rent" is our single best creative, with 141 sign-ups. Rent is the most urgent lump sum for our audience.

STRONG

Ajo stories

58%

Three ajo creatives brought in 273 sign-ups between them. People recognise the ajo they know and want it done safely.

LAGGING

Capital and dreams

11%

"Get Capital" and "Your dreams shouldn't wait" brought in 53. Broad promises land softer than a specific problem.

What we do in week two

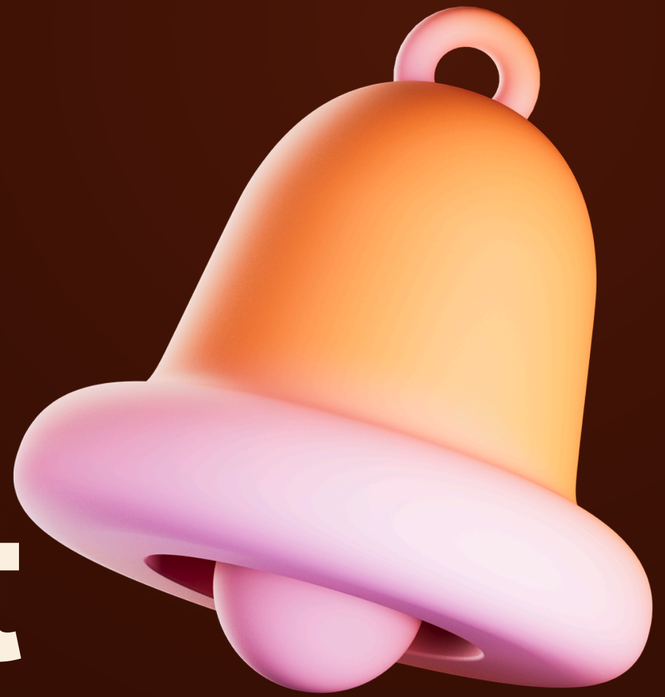

01
Back the winners
Move Facebook budget towards "Next Rent" and the ajo story creatives, and cut back on the capital-led ones.

02
Scale Google
At ₦577 a sign-up it's our cheapest platform. Increase spend and watch that the cost holds.

03
Take rent and ajo to TikTok
Test the winning angles on TikTok, and review Snapchat, which has brought in just 1 sign-up so far.

04
Switch on creators
Roll out the 11 influencer briefs and the engineered virality with Samuel Banks, then track sign-ups weekly.
